PROFESSIONAL PROFILE

Agribusiness management technician and current Máster en Agro 4.0 student with more than ten years of hands-on experience in agricultural operations. Hybrid profile combining field knowledge, international customer service and skills in precision agriculture, IoT, software and databases. Interested in operations, support, implementation and business development roles across agribusiness and agricultural technology.

RELEVANT EXPERIENCE

Agricultural operations | Familia Riart | Argentina **| 2012–2017 and 2018–2023**

- Sowing of soybean, maize, wheat, oats and pasture crops; equipment operation, logistics and task planning during agricultural campaigns.
- Use of John Deere machinery with onboard terminals and sensors; first-line diagnosis based on alerts and equipment behaviour.
- Installation of displays and devices, cable routing, basic electrical connections, fuse replacement and sensor cleaning.
- Independent problem-solving and coordination within small teams under changing production conditions.

Chef de rang | Auberge à l'Agneau Blanc | Alsace, France **| 03–12/2025 and 03/2026–present**

- Customer service and advice in Spanish, French, English and Italian; request follow-up and rapid issue resolution.
- Service coordination during peak periods, task prioritisation and communication within multicultural teams.

International hospitality experience | France and Italy **| 2017–2018 and 2024**

- Adaptation to varied operational roles, teamwork and direct contact with international customers.

AGTECH AND TECHNOLOGY PROJECTS

CattleCat | C# .NET, Entity Framework and SQL Server. WPF cattle management application covering farms, lots, livestock numbers, movements and health records. Designed around real farming processes, with stock validation, search and CSV export.

Precision agriculture and IoT. Sentinel-2 and NDVI, SAVI and NDRE indices; drone mission planning and agricultural prescriptions with MyJohnDeere. Projects using ESP32, Raspberry Pi, sensors, SDI-12, telemetry and remote monitoring.

EDUCATION

Máster en Agro 4.0 | AgroTech Campus · Universidad Católica de Ávila (UCAV). March 2026 – March 2027 (expected) · In progress · online · 60 ECTS.

Licenciatura en Gestión de Negocios Agroalimentarios | Universidad Tecnológica Nacional · Facultad Regional Rosario. August 2013 – 2014 · Coursework completed; final dissertation pending.

Tecnicatura Superior en Gestión de Agronegocios | Instituto Superior Parque de España. March 2010 – December 2012 · Completed.

SKILLS

Agribusiness and field operations: precision agriculture · machinery and onboard terminals · sensors · IoT · GPS and connectivity · remote sensing · drones.

Software and data: C#/.NET · WPF · Blazor · SQL Server · PostgreSQL · Entity Framework · LINQ · Git · Docker · functional testing.

Customers and management: requirements analysis · first-line diagnosis · incident follow-up · user training · prioritisation · commercial and customer orientation.

Languages: Spanish native · English C1 · French B2–C1 · fluent Italian · basic Portuguese comprehension.
